

Thermograms of the same person, left pic after 15 minutes on an unprotected cell phone, note high temp red heat signature; right picture after 15 minutes on cell phone protected by BioPro cell chip. **For info 808-221-1063, Dr Mike Ihara**

**Figure 1.** Estimation of the penetration of electromagnetic radiation from a cell phone based on age (Frequency GSM 900 Mhz) (On the right, a scale showing the *Specific Absorption Rate* at different depths, in W/kg) [1]

Cell phone radiation projects a lot further into the skull with younger children. The Russian National Committee on Non-Ionizing Radiation Protection says that use of the phones by both pregnant women and children should be "limited". It concludes that children who talk on the handsets are likely to suffer from "disruption of memory, decline of attention, diminishing learning and cognitive abilities, increased irritability" in the short term, and that longer-term hazards include "depressive syndrome" and "degeneration of the nervous structures of the brain". **Get cell chips for your child's cell phone.**

Intense reds from computer and WIFI
